Report Overview

Hybrid vehicles are automobiles that utilize a combination of an internal combustion engine and an electric motor to propel the vehicle. These vehicles are designed to be more fuel-efficient and environmentally friendly compared to traditional gasoline-powered vehicles. By seamlessly switching between the gasoline engine and electric motor, hybrid vehicles can optimize fuel consumption and reduce emissions. The market for hybrid vehicles has been steadily growing in recent years due to increasing concerns about climate change, rising fuel costs, and government incentives to promote clean energy transportation solutions.
