Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hydroforming Presses competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Hydroforming Presses production reached approximately 1,085 units with an average global market price of around k US\$1,200 per unit. Single-line annual production capacity averages 150 units with a gross margin of approximately 18-25%. The upstream of the hydraulic forging press machine industry involves core components such as steel, casting, hydraulic systems, and control systems, primarily concentrated in the field of heavy machinery manufacturing. Downstream applications consist of metal processing accounting for approximately 70%, composite material applications at around 20%, with other sectors such as aerospace and automotive making up the remaining 10%. Hydraulic forging presses are mechanical devices that utilize high-pressure fluids to transmit energy, with hydraulic cylinders generating substantial thrust to drive dies for forging metals or other plastic materials. Relying on the precise control of the hydraulic system, they achieve high-tonnage, precision, and efficient forging operations, ensuring uniform material deformation and superior mechanical properties. These presses are pivotal in metal plastic processing due to their powerful pressure output, stable forging speed, and excellent force transmission efficiency. By accurately controlling pressure and speed, hydraulic forging presses can produce components with complex shapes and precise dimensions, while reducing energy consumption and production costs, and enhancing production efficiency and product quality.

The global Hydroforming Presses market size was estimated at USD 2400.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.
