Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hydroformylation Rhodium Catalyst competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Hydroformylation rhodium catalyst is a type of rhodium-based complex catalyst used to drive the hydroformylation reaction of olefins with carbon monoxide and hydrogen to produce aldehydes. Characterized by mild reaction conditions (low temperature and pressure), high selectivity, and strong activity, it is widely applied in industrial synthesis of butanol, octanol, etc., serving as a key material for detergents and fragrances. It offers higher efficiency and environmental friendliness compared to cobalt catalysts. Market Drivers Growth in demand for downstream products: Butanol and octanol, as core downstream products, directly drive the demand for rhodium catalysts. At the same time, the demand for high-purity aldehyde intermediates in emerging fields such as new energy battery materials and degradable plastics has increased, promoting the application of high-activity rhodium catalysts. Policies and environmental protection promote technology upgrades: China's "dual carbon" goals accelerate the green transformation of the chemical industry, and high-efficiency and low-rhodium catalysts and recycling technologies have become key development directions. Market Resistance Rhodium price fluctuations and supply risks: Rhodium metal prices are significantly affected by South Africa's supply (accounting for 80% of the world) and investment demand. In recent years, the price of rhodium metal has fluctuated frequently. Overcapacity of butanol and octanol: At present, the planned production capacity of butanol and octanol far exceeds the actual demand. Intensified competition has led to a downward trend in global prices, compressing the profit space of catalysts.

The global Hydroformylation Rhodium Catalyst market size was estimated at USD
