Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hydrogen Electrolyzer Rectifier competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production reached approximately 914, with an average global market price of around US\$120,000 per unit. A hydrogen electrolyzer rectifier is a power supply device specifically designed for water electrolysis hydrogen production systems. It converts alternating current (AC) into controlled direct current (DC), providing stable and adjustable voltage and current to meet the operational requirements of the electrolyzer. The rectifier typically includes overcurrent and overvoltage protection as well as power regulation features, serving as a core power unit for safe and efficient operation of the electrolyzer. The hydrogen electrolyzer rectifier, as a critical power supply unit for water electrolysis hydrogen production systems, is experiencing significant growth driven by the global transition to green hydrogen. According to the International Energy Agency (IEA), global electrolyzer installed capacity reached 1.4 GW by the end of 2023, nearly doubling from the end of 2022, indicating robust growth momentum. This trend is expected to continue into 2024, with China projected to account for nearly 70% of the global new installations. As electrolyzer capacity expands, the demand for rectifiers is anticipated to increase correspondingly. Furthermore, rectifier technologies are advancing towards higher efficiency and reliability to meet the operational requirements of large-scale electrolyzer systems. Overall, the hydrogen electrolyzer rectifier market holds promising prospects and is expected to play a pivotal role in the global green energy transition.

The global Hydrogen Electrolyzer Rectifier market size was estimated at USD 110.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

34.20% during the forecast period.
