Report Overview

A hydrogen refrigerated truck is a type of commercial vehicle that uses hydrogen fuel cells to power its refrigeration unit, keeping cargo at controlled temperatures during transportation. These trucks leverage the clean energy from hydrogen fuel cells, which generate electricity through a chemical reaction between hydrogen and oxygen, producing only water as a byproduct. This technology offers an eco-friendly alternative to traditional diesel-powered refrigerated trucks, reducing greenhouse gas emissions and improving air quality. Hydrogen refrigerated trucks are particularly advantageous for transporting perishable goods over long distances, providing a sustainable solution that aligns with the growing emphasis on reducing the environmental impact of the logistics and transportation industry.
