Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hydroxyl-terminated polybutadiene (HTPB) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Hydroxyl-terminated polybutadiene (HTPB) is a liquid oligomer of butadiene with hydroxyl functional groups at both ends of the polymer chain. It is primarily used as a binder, plasticizer, or prepolymer in solid rocket propellants, adhesives, sealants, and coatings. Due to its low glass transition temperature, excellent mechanical properties, and chemical stability, HTPB provides flexibility and durability in various formulations. When cured with isocyanates, it forms a crosslinked polyurethane network with high strength and resilience, making it ideal for demanding aerospace, defense, and industrial applications. According to the needs of different application fields, hydroxyl-terminated polybutadiene can be customized by adjusting parameters such as molecular weight and hydroxyl content to meet the special needs of different industries. At present, the downstream customers of hydroxyl-terminated polybutadiene are relatively concentrated, and hydroxyl-terminated polybutadiene is a sensitive material, and its export needs to be approved by government departments of various countries. With the continuous advancement of science and technology and the expansion of emerging application fields, such as the development of new energy vehicles, aerospace, biomedical engineering, etc., the demand for high-performance materials such as hydroxyl-terminated polybutadiene will continue to grow, and the market prospects are broad. In general, the hydroxyl-terminated polybutadiene industry has the characteristics of high performance, multi-function, high technical threshold and customized services, and with the expansion of new application fields, its market demand is expected to continue to grow.

The global Hydroxyl-terminated polybutadiene (HTPB) market size was estimated at USD 186.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
