Report Overview

Hypercholesterolemia is a genetic disorder characterized by very high levels of cholesterol in the blood. Hypercholesterolemia, also termed as dyslipidemia, is a form of hyperlipidemia and hyperlipoproteinemia in the body. Presence of low-density Lipoprotein Cholesterol (LDL-C) or bad cholesterol in the blood, may lead to cardiovascular diseases. Hypercholesterolemia is caused due to a combination of genetic and environmental factors. Environmental factors include excessive diet intake and obesity. In case of genetic factors, the number of copies of the gene determines the severity of the disease.
