Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Ice Mold with Storage Container competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of ice mold with storage container was approximately 40-60 million units, with an average selling price of approximately US\$12-25 per unit and a gross profit margin of approximately 35%. Single-line production capacity was approximately 1-5 million units per year. Ice trays with integrated storage boxes are integrated ice-making and ice-storage containers. They combine a traditional ice tray (ice-making part) with a sealed or semi-sealed storage box (ice-storage part), aiming to solve the inconvenience of transferring ice after making ice with traditional ice trays, providing a more hygienic and convenient ice-making and ice-retrieval experience. The upstream of ice tray manufacturers primarily comes from the petrochemical industry, which provides food-grade plastic raw materials such as PP, PS, and silicone. The midstream involves manufacturing, using processes such as injection molding and assembly. Downstream, they reach consumers through online e-commerce, offline home furnishing stores, and supermarkets. The core demand for the product stems from the pursuit of convenience in ice making and storage in daily family life. Its "integrated" design solves the pain points of traditional ice cube trays being easily contaminated and inconvenient to use. The main driving force comes from the general demand of people to improve the experience of life details and the efficiency of kitchen space utilization in the context of consumption upgrading.

The global Ice Mold with Storage Container market size was estimated at USD 810.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
