## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on ICT and FCT Test Equipment competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In-Circuit Tester is an equipment for printed circuit board test. Using a bed of nails in-circuit test equipment it is possible gain access to the circuit nodes on a board and measure the performance of the components regardless of the other components connected to them. PCB functional testing is the most comprehensive testing regimen for determining whether a manufactured board can leave the factory and be shipped to the customer. The goal is to identify manufacturing defects that affect reliability, missing or incorrect components, and opens/shorts in nets or solder connections. Rapid growth in consumer electronics, communication devices, automotive electronics, industrial automation, and medical electronics has increased the complexity of circuit boards and finished products, creating a strong need for high-precision, high-efficiency testing equipment. Strict quality control standards and reliability requirements encourage manufacturers to adopt ICT and FCT solutions to reduce rework and minimize product failures. Additionally, faster product life cycles, the adoption of automated production, and the rise of smart manufacturing are further boosting the demand for automated testing equipment. Overall, electronics industry growth, increasing product complexity, higher quality control standards, and the trend toward automation and smart manufacturing are the key factors driving the ICT and FCT tester market. The global key manufacturers of In-Circuit Testers & Functional Testers include Keysight, Teradyne, TRI, Hioki, SPEA, Digitaltest, Okano, ADSYS Technologies, and PTI, etc. In 2024, the global top five players had a share approximately 65% in terms of revenue.
