Abstracts

This article mainly counts IGBT single tubes and modules. Single tube refers to a single IGBT chip package, with a current of less than 50A; modules generally package multiple IGBT chips and diodes together, with relatively high power, mainly in high-power scenarios, such as electric vehicles and rail transit. Different application scenarios require different voltages, which can be divided into low voltage 650V-1200V, medium voltage 1200V-2500V and high voltage above 2500V. Globally, the IGBT single tube + module market is mainly dominated by Infineon, Mitsubishi Electric, Fuji Electric, SEMIKRON Danfoss, Hitachi and StarPower, with the global Top 5 companies' market share approaching 70%. In the field of terminal consumption, the industrial equipment sector occupies a larger share. However, with the development and penetration of electric vehicles in recent years, the demand for IGBT has been driven by rapid growth. It is expected that the market share of electric vehicles will be close to 30% by 2029.

The global IGBT Devices and Modules market size was estimated at USD 6971.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.10% during the forecast period.
