## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Image Size Measuring Instrument competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Image dimension measuring instrument is a device based on image processing technology for non-contact measurement of geometric dimensions such as length, width, height, angle, etc. of objects. It uses high-resolution industrial cameras to collect target images and uses image processing algorithms to extract edges, identify features and calculate dimensions. It is widely used in electronics, manufacturing, automobiles, medical and other fields, especially suitable for the precision measurement of tiny parts. Image dimension measuring instruments can be mainly divided into two categories: 2D image measuring instruments and 3D image measuring instruments. 2D measuring instruments obtain plane dimension information through single-view images and are suitable for the measurement of regular parts; while 3D measuring instruments obtain three-dimensional geometric information of objects through multi-view imaging or structured light and other technologies, which can more comprehensively measure complex structures and are suitable for high-precision and high-complexity industrial scenes. With the development of intelligent manufacturing and automated testing, image dimension measuring instruments are evolving towards higher precision, higher speed and intelligence. The introduction of artificial intelligence algorithms has greatly improved its recognition ability in complex backgrounds. In addition, the trend of miniaturization and integration also makes it easier to deploy it on the production line, realize real-time online measurement, and provide more reliable data support for industrial quality control.

The global Image Size Measuring Instrument market size was estimated at USD 1212.0
