Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Imatinib Mesylate API competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Imatinib mesylate API is a small molecule tyrosine kinase inhibitor with a chemical structure of 4-[(4-methylpiperazine-1-yl)methyl]-N-[4-methyl-3-[[4-(3-pyridyl)-2-pyrimidinyl]amino]phenyl]benzamide methanesulfonate and a molecular formula of $C_{27}H_{34}N_8O_3S$. Its mechanism of action is to specifically bind to and inhibit the tyrosine kinase activity of Bcr-Abl fusion protein, c-Kit receptor and platelet-derived growth factor receptor (PDGFR), block abnormal signal transduction pathways, thereby inhibiting tumor cell proliferation and inducing apoptosis. It is mainly used clinically to treat Philadelphia chromosome-positive chronic myeloid leukemia (CML) and gastrointestinal stromal tumors (GIST). The imatinib mesylate API market is currently showing a steady growth trend, mainly driven by the rising prevalence of indications such as chronic myeloid leukemia (CML) and gastrointestinal stromal tumors (GIST). The market dynamics present the following characteristics: 1. Competition landscape and dominance of generic drugs: the core compound and crystal patents have expired (the compound patent expired in 2013, and the crystal patent expired in 2018). Generic API companies such as Aurobindo Pharma, Cadila Healthcare, and Laurus Labs have accelerated their layout, driving down costs and improving accessibility, while intensifying price competition. 2. Regional and product differentiation: North America is the largest regional market, and Asia Pacific (especially China and India) has become the fastest growing region due to the growth of medical demand and capacity expansion; products are mainly high-purity (>99%), accounting for more than 80%, and are mainly used in tablet production (oral dosage forms are dominated by convenience).

The global Imatinib Mesylate API market size was estimated at USD 179.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.00% during the forecast period.
