## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Imitation Electroplating Aluminum Silver Paste competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Imitation electroplating aluminum silver paste is a metal effect paste made by surface treating and dispersing high-purity aluminum powder through a special process, and then adding the corresponding resin and solvent system. Its core lies in utilizing the mirror reflection characteristics of aluminum powder, and realizing the directional arrangement of aluminum powder on the surface of the substrate through dispersants and film-forming additives, thus presenting a high-gloss silver metal texture similar to vacuum electroplating or wet electroplating. Compared with traditional electroplating processes, imitation electroplating aluminum silver paste does not require complex electrochemical equipment and acid-base wastewater treatment processes, and has the advantages of simple process, good environmental performance, and relatively low cost; at the same time, its formula often uses blade-type or non-blade-type aluminum powder to meet the requirements of adhesion, weather resistance and hiding power of different substrates (such as plastics, galvanized sheets, glass, ceramics, etc.). During the construction process, the paste can be evenly applied to the surface of the substrate by spraying, dipping or screen printing. After baking or natural drying, the aluminum powder is directionally deposited in the resin film layer to form a continuous reflective layer, and finally a mirror effect comparable to that of electroplated parts is obtained.

The global Imitation Electroplating Aluminum Silver Paste market size was estimated at USD 752.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the forecast period.
