Report Overview

The market for implanted teeth, also known as dental implants, involves artificial tooth roots surgically placed into the jawbone to support crowns, bridges, or dentures, providing a permanent solution for missing teeth. This market is driven by increasing demand for cosmetic dentistry, rising prevalence of dental disorders due to aging populations and poor oral hygiene, and advancements in implant materials and techniques such as titanium and zirconia implants. Key segments include endosteal and subperiosteal implants, with endosteal dominating due to higher durability. Geographically, North America and Europe lead due to high healthcare expenditure and awareness, while Asia-Pacific is growing rapidly due to improving healthcare infrastructure and rising disposable incomes. Major players include Straumann, Dentsply Sirona, and Zimmer Biomet, who invest heavily in R&D and minimally invasive procedures. However, high costs and limited reimbursement policies in developing regions remain barriers, though increasing adoption of digital dentistry and CAD/CAM technologies is expected to further expand the market.

The global Implanted Teeth market size was estimated at USD 3298.74 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.85% during the forecast period.
