Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on IMU Attitude Sensor competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global IMU Attitude Sensor production reached approximately 4.2 million units, with an average global market price of around US\$ 15k per unit. An IMU (Inertial Measurement Unit) attitude sensor is a high-precision inertial sensing system used to measure the attitude, acceleration, angular velocity, and orientation changes of an object. Its core components include an accelerometer, a gyroscope, and sometimes a magnetometer. By fusing and calculating three-axis motion information, it achieves real-time measurement of the object's spatial attitude. The IMU (In-Mechanical Unit) attitude sensor industry chain can be divided into three segments: upstream core components and materials, midstream system integration and packaging, and downstream application terminals. The upstream segment mainly includes MEMS chips, gyroscope sensors, accelerometer wafers, packaging substrates, ASIC control chips, and casing materials, with representative suppliers including STMicroelectronics, Bosch Sensortec, Analog Devices, TDK InvenSense, and Murat. The midstream segment consists of system integration and algorithm development companies, responsible for multi-sensor data fusion, temperature drift compensation, calibration, and interface module development; representative manufacturers include Honeywell, Sensoror, and Bosch. Downstream applications are widely used in drones (DJI), robots (ABB, Yaskawa), automotive electronics (Tesla, BYD, Bosch), industrial automation (Siemens, Fanuc), smartphones and wearable devices (Apple, Huawei, Xiaomi), and other fields. The annual production capacity of a single-line IMU Attitude Sensor is approximately 300k units, with a gross profit margin of approximately 20%-45%.

The global IMU Attitude Sensor market size was estimated at USD 839.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.70% during the forecast period.
