### Report Overview:

A gun safe is a safe for one or more firearms and/or ammunition for guns. Gun safes are primarily used to prevent access to unauthorized or unqualified persons, for burglary protection, and, in more capable safes, to protect the contents from damage during a flood, fire, or natural disaster. Gun safes have largely replaced the gun cabinets made of fine stained wood with etched glass fronts used for display that were commonly used decades ago, although some gun safes are made to resemble such gun cabinets. The report studies vehicle gun safes which can be installed in vehicle seat console, fold down armrest, vehicle trunk and other places.

The Global In-vehicle Gun Safes Market Size was estimated at USD 333.59 million in 2023 and is projected to reach USD 457.36 million by 2029, exhibiting a CAGR of 5.40% during the forecast period.
