Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Industrial Collaborative Robot competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Industrial Collaborative Robots (Cobots) are flexible robotic systems designed for safe human-robot interaction, used in assembly, machine tending, packaging, electronics manufacturing, laboratory automation and small-batch customized production. In 2024, the global average price of collaborative robots is approximately US\$19,800 per unit, with worldwide shipments reaching around 78,000 units. Gross margins typically range from 28%-45%, driven by sensor integration, force control algorithms, lightweight materials, safety certification and modular joint design. The supply chain includes upstream harmonic reducers, servo motors, force-torque sensors, controllers, embedded software and lightweight arm components; midstream manufacturers perform robot arm design, motion integration, safety control, calibration and testing; downstream customers include electronics factories, automotive suppliers, metal processing shops, packaging lines, medical device manufacturers, semiconductor fabs and various automation integrators. Collaborative robots are rapidly transforming industrial automation by offering flexible deployment, lower integration costs and enhanced safety. Their adoption is accelerating in electronics, machine tending, semiconductor processing and logistics as labor costs rise and production becomes more customized. Improvements in force control, AI-based perception, and lightweight design will continue expanding cobot applications, supporting strong double-digit growth through 2031.

The global Industrial Collaborative Robot market size was estimated at USD 1544.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

13.70% during the forecast period.
