Abstracts

Industrial Heat-Shrink Labels are a special label material, usually made of thermoplastics such as polyolefin (such as polyethylene, polypropylene). This kind of label will shrink after heating and fit tightly on the surface of objects of various shapes and sizes, forming a waterproof, dustproof, and wear-resistant protective layer. Industrial heat shrink labels market trends show a steady growth trend. With the rapid development of industrial production and logistics industries, especially the growth of petroleum, chemical, pharmaceutical, food and other industries, the demand for industrial heat shrinkable labels continues to increase. At the same time, the continuous emergence of new technologies and improvements in quality have further broadened the application fields of heat shrinkable labels. In addition, the market's demand for customization is also increasing. Companies can customize heat shrink labels of different shapes, sizes and contents according to customer needs, meeting the personalized needs of customers. However, the market is also facing cost pressure and price competition.
