## Abstracts

Pipe support fixings are best defined as the support mechanism for suspended pipes, whether that be horizontal overhead or vertical, adjacent to a surface. They are vital in ensuring all pipes are fixed securely while also allowing for any pipe movement or expansion that may occur. Rapid urbanization in emerging countries has greatly increased the demand for infrastructure services such as water supply, roads and transport, electricity supply and sanitation. Additionally, due to the increased rate of population migration to metropolitan areas, there is a greater need for efficient wastewater plumbing structures, which can be accomplished through the use of pipe hangers and supports. Major companies around the world are introducing pipe hangers and supporting unique materials and engineering designs in order to meet the needs of end customers. In the near term, this is likely to stimulate the demand for pipe hangers and support market growth. Variable spring hangers and brackets and constant pipeline hangers and brackets are expected to witness strong market demand owing to their need to be installed in larger plants such as power generation facilities, water pipelines, and other supplementary facilities in nuclear power plants. According to the U.S. Energy Information Administration, investments in multiple pipeline hangers are increasing and supporting the end-use segment of the market, where significant end-uses including power generation facilities will be built in a zero-carbon emission manner. Huge investments are being made to replace old coal-fired generation facilities with new nuclear and other installations. Developing countries in Asia Pacific account for a considerable share of the global pipe hangers and brackets market. Asia is expected to remain a potential market for pipe hangers and supports over the forecast period owing to the increasing use of pipe hangers and supports in various applications over the past few years. In addition, rapid urbanization and industrialization in Asian countries, as well as the optimistic outlook of the building materials industry, indirectly drive the demand for the pipe hangers and brackets market. Export activity in the region is also high and

is expected to present significant potential opportunities for players in the global pipe hangers and brackets market.

The global Industrial Pipe Support Fixings market size was estimated at USD 1663.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.
