Report Overview

Industry Grade Handheld Terminals include a plurality of industrial PDA, barcode handheld terminals, RFID handheld terminals, etc. The industrial handheld terminal is characterized by its sturdiness and durability, which can be used in many harsh places, and has been optimized for industrial use. Industrial-grade handheld terminals can support both RFID read and write and barcode scanning functions, and have the following three features:

1. RFID read/write function: RFID technology has the advantages of waterproof, anti-magnetic, high temperature resistance, long service life, large reading distance, data on the label can be encrypted, storage data capacity is larger, and storage information can be changed freely. . RFID is divided into low frequency, high frequency, and ultra high frequency.
2. Industrial protection level: In many cases, the application environment of the handheld terminal is relatively harsh. The higher the industrial protection level, the higher the stability of the product operating in these environments. For example, oil pollution, outdoors in the north, and cold chain links require higher levels of protection for products.
3. Explosion-proof performance: There are some special industrial applications, such as chemical plants, gas stations, etc. In these environments, the handheld terminals are required to have explosion-proof performance.
