Abstracts

Inline skates are a type of roller skates used in the most common in-line skating. Unlike roller skates with two front and two rear wheels, inline skates usually have two to five wheels arranged in a single row. Some, especially those used for entertainment, have rubber "stop" or "brake" pads attached to the back of one or two skates so that the skater can slow down or stop by braking the skates against the feet. Global key players of Inline Skates include K2, Tecnica Group, Decathlon, CCM Hockey, Bauer Hockey, etc. The top five players hold a share over 50%. North America is the largest market, has a share about 43%, followed by Europe, and Asia-Pacific, with share 32% and 21%, separately. In terms of end user, Adult is the largest group, occupied for a share of 74%, and in terms of sales channel, Offline Retail has a share about 78%.
