Report Overview

Insulated shipping containers are light, reusable, recyclable, and cost-effective. These shippers are made up of two parts: a tight-fitting cover and a smoothly shaped body. Insulated shippers are primarily used as a packaging material since they ensure the safe delivery of temperature-sensitive goods. These may transport a temperature-sensitive load with a volume ranging from 4 to 100 liters. These shippers provide rapid preconditioning and packaging of loads, as well as maintaining load temperature for 48 to 120 hours, which can be increased with the use of appropriate insulating materials and refrigerants. Insulated shippers are used to carrying pharmaceutical items such as blood, vaccinations, and temperature-sensitive medications.
