### Report Overview

Plastic case circuit breakers are also called device-type circuit breakers. Plastic case refers to the use of plastic insulators as the shell of the device to isolate conductors and grounded metal parts. All parts are sealed in plastic housing. The overcurrent release of the intelligent molded case circuit breaker is electronic. The rated current of the circuit breaker is adjustable according to the line load, and the three-stage protection curve is adjustable. It can cooperate with lower-level circuit breakers to achieve hierarchical protection. The electronic overcurrent release has high protection accuracy and is less affected by the ambient temperature and installation position. It is an upgraded product of the thermal magnetic overcurrent release.

The global Intelligent Molded Case Circuit Breaker market size was estimated at USD 285.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.85% during the forecast period.
