The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Intelligent Ship Propulsion System competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Intelligent ship propulsion systems refer to marine power systems that combine electric or hybrid propulsion technology with advanced intelligent control, energy management, and data monitoring functions. By integrating motors, electronic control units, thrusters, energy management systems, and sensor networks, these systems achieve intelligent optimization and adjustment of ship propulsion efficiency, speed, energy consumption, and heading, while also supporting remote monitoring, fault diagnosis, and automated operation. Compared to traditional propulsion systems, intelligent ship propulsion systems are characterized by energy saving, environmental friendliness, low noise, high reliability, and ease of operation, and are widely used in various ship types, including yachts, sightseeing boats, research vessels, and port operation vessels. The downstream industries of intelligent ship propulsion systems mainly cover high-end yacht manufacturing, sightseeing and tourism vessels, research and survey vessels, port patrol and law enforcement vessels, and environmental protection vessels. In these industries, the propulsion system not only provides power output but also integrates intelligent control, energy management, and remote monitoring functions to improve ship navigation efficiency, energy saving, and safety. Due to the system's technical complexity, high integration, and strong customization, the gross profit margin is generally high, typically around 53%. In 2024, the global production of intelligent ship propulsion systems reached 133,070 units, with an average selling price of US\$7,800 per unit.

The global Intelligent Ship Propulsion System market size was estimated at USD
