Abstracts

An interactive dark ride system is an immersive entertainment experience system that combines virtual reality (VR) or augmented reality (AR) technology. It is usually located in an environment-controllable, themed interior. Visitors take rail tour vehicles and other vehicles, follow a set story route, and travel through a themed environment that combines virtual and real scenes. Through multiple elements such as audio-visual effects, dynamic seats, and environmental interactions, as well as a three-dimensional track design with multiple uphill, downhill, and rapid dives, visitors feel as if they are in a virtual world and experience thrilling or fantastical plots. An interactive system is added to the original 4D elements, allowing visitors to compete with characters in the virtual scene to increase the interactive experience.
