Report Overview

Interior stain is a type of wood finish specifically designed for use on interior surfaces, such as wooden furniture, floors, and walls. It is formulated to penetrate the wood fibers, providing a protective layer that enhances the natural wood grain while offering resistance to moisture, stains, and wear. Interior stain is typically water-based or oil-based, and it comes in various colors and finishes, allowing for customization to match the desired aesthetic. It is important to note that interior stains are not recommended for exterior use due to their lack of UV protection and potential for color fading.
