Report Overview:

Inventory tank gauging systems are used to measure the level of liquid contained inside a tank. There are two types of tank gauging systems-point level instruments and continuous level instruments. Honeywell International, Schneider Electric, and Emerson are some of the key players in the inventory tank gauging system market.

Growth of the chemical and petrochemical industries is expected to fuel the market since it helps measure bulk liquids in storage tanks. Chemical manufacturing requires a complex series of processes such as condensing, cooling, and heating for evaporation and separation. However, the exposure of inventory tank gauging instruments in extreme climatic conditions is expected to restrict the market growth. Moreover, increasing uses of radar level transmitters in various industry verticals such as oil & gas, marine, chemical, and others provide ample growth opportunities since it is used to detect continuous level measurement applications.

The Global Inventory Tank Gauging System Market Size was estimated at USD 659.74 million in 2023 and is projected to reach USD 792.36 million by 2029, exhibiting a CAGR of 3.10% during the forecast period.
