Abstracts

Ionizing guns and nozzles are specialized industrial equipment designed to neutralize static electricity on surfaces through the emission of ionized air, utilizing either compressed air (pneumatic) or built-in fans (non-pneumatic) to direct a controlled stream of balanced positive and negative ions toward a target area; these devices are critical in manufacturing and processing environments where electrostatic discharge (ESD) poses risks to product quality, operational safety, or efficiency, such as in electronics assembly, plastics handling, printing, packaging, and cleanroom applications, by preventing issues like dust attraction, material jamming, spark hazards, or damage to sensitive components.

The global Ionizing Guns And Nozzles market size was estimated at USD 180.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.85% during the forecast period.
