## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on IoT Access Controller competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global IoT access controllers production reached approximately 3.97 million, with an average global market price of around US\$ 1000 per unit. IoT access controllers are intelligent access control systems that combine IoT technology to manage access rights to buildings or specific areas. Compared with traditional access control systems, IoT access controllers can remotely manage, monitor, and adjust access rights, greatly improving the intelligence and convenience of access control. These controllers are usually connected to cloud platforms, smartphones, computers, and other devices through the Internet or local area network to achieve real-time monitoring, remote unlocking, multiple authentication (such as face recognition, fingerprint recognition, passwords, etc.), and access record management and tracking. With the rapid advancement of smart buildings, intelligent campuses, and Industry 4.0 initiatives, the IoT access control controller market is experiencing sustained growth. These devices not only support traditional authentication methods such as IC cards and PIN codes but also integrate advanced features like facial recognition, fingerprint authentication, mobile apps, Bluetooth, and QR code scanning, greatly enhancing the flexibility and efficiency of security management. Increasingly, enterprises, government agencies, healthcare providers, and educational institutions are deploying cloud-based access control systems to enable remote management, granular permission control, real-time data synchronization, and intelligent analytics. Moreover, IoT access controllers are evolving toward integration with edge computing, AI algorithms, and building automation systems, pushing the industry toward high-performance, low-latency, and scalable solutions.

The global IoT Access Controller market size was estimated at USD 3969.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 14.70% during the forecast period.
