The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on IP Video Intercom Devices competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global IP Video Intercom Devices production reached approximately 6,666,667 units, with an average global market price of around US\$ 480 per unit. The gross profit margin of major companies in the industry is between 50% ? 68%. Single-line production capacity is 1,000,000 ? 2,500,000 units/year. IP Video Intercom Devices are digital communication systems that use Internet Protocol (IP) networks to transmit audio, video, and control signals between entry points and indoor monitors. These devices enable real-time two-way video calling, remote door unlocking, and integration with smart home or building management systems, providing enhanced security and convenience for residential, commercial, and multi-tenant buildings. The global IP video intercom devices market is experiencing rapid growth driven by increasing demand for smart home technologies, urbanization, and rising security concerns. The shift from analog to digital IP-based systems offers superior video quality, scalability, and seamless integration with mobile apps and cloud services. Advancements in AI, such as facial recognition, motion detection, and voice activation, are enhancing user experience and security functionality. The expansion of smart city initiatives and new residential construction in Asia-Pacific, North America, and Europe is fueling adoption. Additionally, integration with broader smart building ecosystems, including access control and home automation, is creating added value. While high initial costs and network dependency remain challenges, decreasing component prices and improved cybersecurity measures are mitigating risks. OEMs are focusing on interoperability with major smart home platforms (e.g., Google Home, Apple HomeKit). Overall, the market is moving toward intelligent, connected, and user-centric solutions that support secure

and convenient access control.

The global IP Video Intercom Devices market size was estimated at USD 3200.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.40% during the forecast period.
