Report Overview

An IP68 rotary encoder refers to a rotary encoder that has an IP68 rating, indicating its high level of protection against dust and water. IP68 is one of the highest degrees of Ingress Protection (IP) ratings available, ensuring that the rotary encoder is impervious to dust and can withstand immersion in water up to a certain depth and duration specified by the rating. This makes IP68 rotary encoders ideal for use in harsh and demanding environments where exposure to dust, moisture, or water is prevalent, such as in industrial automation, marine applications, outdoor equipment, or automotive systems that require precise position sensing and control.
