The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on IQ Mixer Module (Connectorized) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An IQ mixer module (Connectorized) is a pre-assembled electronic component that integrates the functionality of an in-phase and quadrature (I/Q) mixer. This module typically includes one or more mixer chips, power management circuits, control interfaces, and connector interfaces. It allows users to input signals through external connectors, and the module then outputs the corresponding I and Q signals.
