An ISO standard PWHC (Portable Water Handling Container) is a specialized type of intermodal container designed for the safe and efficient transport and storage of potable water in bulk quantities, adhering to strict International Organization for Standardization (ISO) specifications for dimensions, structural integrity, materials, and hygiene. These containers are typically constructed from food-grade stainless steel or other approved materials resistant to corrosion and contamination, featuring standardized corner castings for compatibility with global multimodal transport systems such as ships, trucks, and trains. The design prioritizes ease of cleaning, secure sealing to prevent leakage and preserve water quality, and often includes insulation or temperature control mechanisms to maintain water safety during transit. Their standardized nature ensures interoperability across supply chains, making them essential for humanitarian aid, military operations, disaster relief, and commercial water distribution where reliable, large-volume water mobility is required under varying environmental and logistical conditions.
