Report Overview

Isoamyl acetate (CAS 123-92-2), also known as isopentyl acetate, is a colorless ester with a strong banana-like odor, widely used as a flavoring agent in food and beverages, a fragrance in cosmetics and personal care products, and a solvent in industrial applications such as paints, coatings, and adhesives. Its market is driven by demand from the food and beverage industry, where it is valued for its fruity aroma, as well as growth in the cosmetics sector due to increasing consumer preference for natural and synthetic fragrances. The industrial segment benefits from its effectiveness as a solvent in lacquers and coatings. However, regulatory scrutiny on synthetic additives and volatility in raw material prices, particularly acetic acid and isoamyl alcohol, pose challenges. Geographically, North America and Europe dominate consumption due to mature food and fragrance industries, while Asia-Pacific shows rapid growth owing to expanding manufacturing and rising disposable incomes. Sustainability trends are pushing manufacturers to explore bio-based production methods, which could shape future market dynamics.
