Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Item Level RFID Tag competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of item-level RFID tags will reach 45.69 billion pieces, with an average selling price of US\$0.0315 per piece. Item-level RFID tags contain an RFID inlay that enables them to communicate with a unique item-level identifier using radio waves. RFID tags are attached to individual products, rather than simply tagging pallets upon arrival and then tracking them within the factory. Retailers and brand owners use RFID tags to assign a unique identification number to each item. RFID readers can read multiple RFID tags simultaneously, improving inventory accuracy, traceability, and product authentication. RFID can be used to tag STUs, such as apparel, library books, jewelry, engineering components, and laundry. The greatest potential for item-level tagging lies in uniquely encoding massive quantities of products, such as consumer goods, mail, clothing, books, pharmaceuticals, and manufacturing parts. These products are produced in quantities of 5 to 10 trillion units annually. Therefore, item-level tagging incorporates most or all of the following characteristics, presenting distinct technical and business challenges from other RFID applications, but also offering numerous advantages.

The global Item Level RFID Tag market size was estimated at USD 1439.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 13.90% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Item Level RFID Tag market, covering all critical facets from a broad macroeconomic overview to

detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
