Typically made of sterile transparent film or gauze, the dressing is suitable for securing and protecting intravenous infusions and injections in hospitals and home care settings. In 2024, global IV cannula dressing production reached approximately 2107 million Pcs, with an average global market price of around US\$84 per 1000 Pcs. This product typically has a single-line production capacity of approximately 50?80 million pieces per year, with an industry gross profit margin of approximately 30%?40%.
