Abstracts

IVD consumables CDMO refers to a professional outsourcing organization that provides integrated services such as R&D, mold design, injection molding, surface treatment, clean assembly and quality control for in vitro diagnostic related consumables. Through the CDMO model, diagnostic companies can focus on product R&D and market promotion, and hand over the production and manufacturing links to service providers with ISO 13485 certification, clean workshops and precision processing capabilities, thereby reducing costs, improving efficiency, and speeding up product launch. It is particularly suitable for the needs of high-precision, small-batch, and multi-category personalized diagnostic consumables.

The global IVD Consumables CDMO market size was estimated at USD 10031.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.00% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global IVD Consumables CDMO market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global IVD
