Abstracts

Jumbo paper straws are large, eco-friendly drinking straws made from biodegradable paper materials designed to accommodate beverages that require a wider straw diameter. These straws are ideal for thick drinks like milkshakes, smoothies, and bubble tea, as their size allows for easier consumption of both liquid and larger components, such as tapioca pearls. As an environmentally sustainable alternative to plastic straws, jumbo paper straws help reduce plastic waste while maintaining functionality. They are often coated with food-safe materials to ensure durability during use without compromising their compostable nature.

The global Jumbo Paper Straws market size was estimated at USD 1073.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.20% during the forecast period.
