Abstracts

Kids Amenity Kits are specially designed travel packages or sets created to enhance the travel experience for children, typically provided by airlines, hotels, or other travel-related businesses. These kits often include a variety of items aimed at keeping children entertained and comfortable during their journey. Common contents may include coloring books, crayons, puzzles, small toys, hygiene essentials, or even child-friendly snacks. The purpose of these kits is to make traveling more enjoyable for kids while reducing stress for parents, ensuring a smoother and more pleasant trip for families. As sustainability becomes a global priority, many brands are shifting towards biodegradable, recyclable, and reusable materials for kids' amenity kits. Plastic toys are being replaced with wooden, bamboo, or fabric-based alternatives to reduce environmental impact. Airlines and hotels are adopting zero-waste initiatives by using organic cotton pouches, compostable packaging, and eco-friendly crayons. Personalized experiences are becoming more popular, with airlines and hotels offering customized amenity kits tailored to individual preferences. Some companies allow children to choose their preferred themes, characters, or colors, while others provide name-engraved pouches, stickers, or luggage tags as keepsakes. High-end airlines are even introducing luxury kits with monogrammed pouches and exclusive travel accessories. Companies are now creating age-specific amenity kits to better meet the needs of different developmental stages. Rather than offering a one-size-fits-all kit, brands are designing kits for toddlers (1?3 years), preschoolers (4?6 years), and school-age children (7?12 years). Additionally, airlines are incorporating sensory-friendly kits for children with special needs, including noise-canceling earmuffs, fidget toys, and calming activity books.

The global Kids Amenity Kits market size was estimated at USD 341.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80% during the

forecast period.
