KNX Products (Konnex) is the worldwide standard for home and building control. The standard is based on the communication stack of EIB but enlarged with the physical layers, configuration modes and application experience of BatiBUS and EHS. KNX Products defines several physical communication media: Twisted pair wiring (inherited from the BatiBUS and EIB Instabus standards); Powerline networking (inherited from EIB and EHS - similar to that used by X10); Radio (KNX Products-RF); Infrared; Ethernet (also known as EIBnet/IP or KNX Productsnet/IP). The most common form of installation is over twisted pair medium. KNX is technology which controls the automation of integral functions of any residential, commercial or industrial building such as HVAC, lighting systems, multimedia, security, energy management and more. KNX combines all main building functions like lighting, heating, air-conditioning or shading into one intelligent system, which helps to lower operational costs resulting in considerable energy savings, to save installation time as well as to increase flexibility and adaptability to future developments. China KNX Products core manufacturers are Schneider Electric, ABB, SIEMENS, Hager (Berker), Legrand, Somfy and etc. The top five manufacturers account for about 14% of the Chinese share. Schneider, ABB and SIEMENS, which belong to the first tier, have the largest market, accounting for 26% of the Chinese market. In terms of product type, Remote Control is the largest segment with a share of about 14%. And in terms of application, Residential Building is the largest downstream segment with a share of 53%.

The global KNX Products market size was estimated at USD 4232.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.70% during the forecast period.
