Abstracts

A wide range of products such as smartphones and electrical appliances are becoming smaller and more functional, and all are now part of everyday life. Semiconductor lithography technology is making a significant contribution to the evolution of semiconductors (semiconductor integrated circuits), which are indispensable components of these products. A semiconductor lithography system undertakes a process whereby highly complex circuit patterns drawn on a photomask made of a large glass plate are reduced using ultra-high-performance lenses and exposed onto a silicon substrate known as a wafer. Semiconductor lithography equipment include EUV lithography machine, ArFi immersion lithography machine, ArF dry lithography machine, KrF lithography machine and i-line lithography machine. This report studies the KrF lithography machine. The global semiconductor lithography machine market is monopolized by three companies, including ASML, Nikon and Canon. ASML is the largest manufacturer, accounting for more than 90% of the market share; Nikon and Canon account for 5% and 5% of the market share respectively. KrF lithography machines are mainly monopolized by ASML, Nikon, and Canon, among which ASML holds more than 70% of the market share. The global market for semiconductor was estimated at US\$ 526.8 billion in the year 2023, is projected to US\$ 780.7 billion by 2030. IC Manufacturing is the process used to manufacture semiconductor devices, typically integrated circuits (ICs) such as computer processors, microcontrollers, and memory chips (such as NAND flash and DRAM). According to our research, the global semiconductor manufacturing (wafer fabrication) market is projected to grow from US\$ 251.7 billion in 2023 to US\$ 506.5 billion by 2030, at a Compound Annual Growth Rate (CAGR) of 40.49% during the forecast period. This will drive rapid growth of global Semiconductor Lithography Equipment.

The global KrF Lithography market size was estimated at USD 3354.0 million in 2025

and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
