## Abstracts

A KYT (Know Your Transaction) system is a financial compliance tool used by institutions to monitor and analyze transactions for potential signs of money laundering, fraud, or other financial crimes. With the total value of money laundering reportedly estimated to be around \$800 billion to \$2 trillion per year, it is imperative that financial institutions implement an effective KYT solution. It is part of a broader set of tools and regulations that institutions use to ensure compliance with Anti-Money Laundering (AML) laws and Counter-Terrorism Financing (CTF) regulations. While KYC (Know Your Customer) focuses on identifying and verifying the identity of a client or customer, KYT extends this concept to the transactions themselves. Its goal is to monitor and evaluate individual transactions to detect suspicious activity, ensuring that they do not inadvertently facilitate illegal activity.
