Abstracts

A Lactase Supplement is a dietary product that provides the lactase enzyme, which helps individuals with lactose intolerance digest dairy products more easily. Lactose intolerance occurs when the body does not produce enough lactase, the enzyme needed to break down lactose—a sugar found in milk and other dairy products—into simpler sugars (glucose and galactose) that can be absorbed into the bloodstream. Without sufficient lactase, lactose passes into the colon undigested, leading to symptoms like bloating, gas, diarrhea, and stomach cramps.

The global Lactase Supplement market size was estimated at USD 650.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
