Report Overview

As a minimally invasive surgery, laparoscopic surgery can avoid the large incision trauma of traditional surgery by puncturing the patient's abdominal cavity with surgical instruments, but traditional medical experiments and teaching are difficult to simulate close to the real scene. Most of the existing laparoscopic surgery teaching can only be done with models.

Laparoscopy simulator is a minimally invasive surgery simulation training tool, suitable for teaching and medical professionals. Laparoscopy training simulators are tools that can be used in training scenarios for laparoscopic surgery because they demonstrate almost all major abdominal surgery procedures.
