Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Laptop Adapter Synchronous Rectification Chip competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Synchronous rectification chips for laptop adapters are specialized controllers placed on the secondary side of the adapter. They detect the voltage drop across the MOSFET's body diode and automatically turn it on and off, replacing Schottky diodes. This reduces rectification losses by two-thirds and improves efficiency. Global shipments are expected to reach approximately 2.18 billion units in 2024, with an average unit price of \$0.20.

The global Laptop Adapter Synchronous Rectification Chip market size was estimated at USD 436.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
