Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Large Fireworks competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of large fireworks will be approximately 297,000 pieces, with an average selling price of approximately US\$1,200 per piece. Large fireworks are high-power, high-altitude explosions designed for public festivals or professional performances. They are classified as dangerous goods (1.3G). Their explosion radius typically exceeds 30 meters, and they can be launched from heights exceeding 100 meters. As display fireworks, they differ from those intended for personal consumption and must be set off by professionals using specialized equipment and obtaining relevant permits. They are widely used in large-scale public events such as National Day celebrations and New Year's Eve countdowns. The large-scale fireworks market is experiencing multi-faceted development trends. City festivals, international sporting events, and the tourism industry are driving the increasing regularity of high-end fireworks displays, while customized fireworks are rapidly gaining popularity in weddings and brand events. Technologically, environmentally friendly, low-smoke products and programmable light-activated fireworks are becoming increasingly popular. Drone fireworks are gradually replacing certain scenes, giving rise to a new trend of integrated performances. Regionally, the Asia-Pacific region continues to dominate the market, thanks to the strong production capacity of China and India. Europe and the United States rely heavily on imports due to regulatory restrictions. The Middle East and Latin America, however, show strong growth potential due to frequent festivals. This global evolution is leading to a dynamic convergence of demand, technology, and regional distribution in the large-scale fireworks industry.

The global Large Fireworks market size was estimated at USD 357.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.80% during the forecast period.
