## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Large-Size Automotive LCD competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A Large-Size Automotive LCD (Liquid Crystal Display) refers to a high-resolution digital display panel typically larger than 7 inches, used in vehicles for functions such as instrument clusters, infotainment systems, navigation, rear-seat entertainment, and central control interfaces. These displays offer wide viewing angles, high brightness, and enhanced durability to withstand automotive environments such as temperature fluctuations, vibrations, and sunlight exposure. Increasingly, they feature touch capability, curved or ultra-wide formats, and integration with advanced driver-assistance systems (ADAS) and digital cockpits, supporting a more immersive and connected driving experience. Annual shipments of this product are less than 100 million units. The price per unit of LTPS LCD products is higher than that of traditional a-Si LCD products, with an average selling price of approximately US\$70 per unit. The gross profit margin for this product is between 15% and 20%. The upstream of the Large-Size Automotive LCD market mainly includes raw material and component suppliers, such as glass substrates, polarizers, backlight units (BLUs), driver ICs, and liquid crystal materials, along with TFT array and module manufacturers who assemble display panels. The downstream consists of automotive OEMs and Tier-1 suppliers (e.g., Continental, Denso, Bosch, and Visteon) who integrate these LCD modules into vehicle systems such as instrument clusters, infotainment displays, and head-up displays. Ultimately, the displays are delivered to automobile manufacturers for installation in passenger cars, commercial vehicles, and EVs, where they enhance driver information, connectivity, and user experience.

The global Large-Size Automotive LCD market size was estimated at USD 5125.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.
