Report Overview:

The effect of laser marking is to expose deep materials through the evaporation of surface materials, or to burn off part of the materials through light energy to reveal the graphics and text that need to be etched. Most metals can be marked using a laser marking machine.

Laser marking system is laser equipment that uses laser beam to permanently mark the surface of various materials.

Compared with traditional marking technology, laser marking technology not only has more advantages in material loss and marking effect, but also is even better in terms of production and processing efficiency and output. Some new laser marking machines that are constantly being developed and applied are even more incomparable with traditional marking technology.
