Report Overview

Lateral flow immunoassays are easy to use. The user simply needs to dip the sample pad into the liquid they want to test and then lay the test flat or apply the sample directly to the cassette. If the test is positive, a colored or fluorescent line will show up on the test along with a control line. If the test is negative, only the control line will be present. For many years, women with no medical training have successfully used this kind of test to detect pregnancy or ovulation at home.
