Report Overview

Airlaid paper is a textile-like material categorized as a nonwoven fabric made from fluff pulp. Compared with normal wet-laid paper and tissue, air-laid paper is very bulky, porous and soft. It has good water absorption properties and is much stronger compared with normal tissue. In the production of latex bonded airlaid paper, liquid binder, such as latex is sprayed on both sides of the web to bind the fibers together. The excess moisture is then dried and the latex is cured in the drying section.
